

Service trolley for restaurant h422_76

Professional service trolley in polypropylene and aluminum (111x50x103 cm), load capacity 150 kg, rust-proof and scratch-resistant structure for the HoReCa sector.

The **h422_76** service trolley represents an advanced logistical solution for handling loads in professional environments such as hotels, restaurants, canteens, and communities. Thanks to the hybrid structure that combines **aluminum and polypropylene copolymer**, the device guarantees high mechanical resistance combined with remarkable maneuvering lightness. The smooth surface and rounded lines have been designed to simplify sanitization cycles, preventing the accumulation of residues and bacteria.

Technical specifications

- **Materials:** Polypropylene copolymer and high-resistance aluminum.
- **Structure:** Scratch-resistant and rust-proof components, resistant to accidental impacts.
- **Configuration:** 3 shelves with anti-slip edges for securing the load.
- **Load capacity:** 50 kg per single shelf (total load capacity 150 kg).
- **Dimensions:** W 111 x D 50 x H 103 cm.
- **Distance between shelves:** 32 cm useful clearance for housing containers and tableware.
- **Ergonomics:** Integrated double anti-slip handles.
- **Sustainability:** Made with separable and fully recyclable technical materials.
- **Colors:** Available in different color variants for aesthetic or functional integration.
