

Service trolley h09_275

Professional AISI 304 stainless steel service trolley, 2 soundproofed shelves 100x60 cm, 200 kg capacity. Ideal for HoReCa and medical use.

The **service trolley h09_275** is a technical solution designed for heavy-duty handling in environments requiring rigorous hygienic standards and high mechanical resistance. Entirely constructed from **AISI 304 stainless steel**, it offers superior protection against corrosion and ease of sanitization, which is essential in professional kitchens, laboratories, and hospital contexts.

Structural solidity is guaranteed by a 25 x 25 mm tubular frame, which supports two shelves with **omega reinforcement**. This configuration prevents bending under load and, thanks to the **integrated soundproofing system**, drastically reduces noise pollution during transit in aisles or dining rooms. Maneuverability is provided by four 125 mm multidirectional wheels, assisted by rubber corner bumpers to protect walls and equipment from accidental impacts.

Technical features

- **Material:** Satin-finished AISI 304 stainless steel
- **Structure:** 25 x 25 mm tubular
- **Total dimensions:** L 112 x W 67 x H 98 cm
- **Shelf useful surface:** 100 x 60 cm
- **Configuration:** 2 soundproofed shelves with omega reinforcements
- **Maximum load capacity:** 200 kg (distributed)
- **Rolling system:** ø 125 mm multidirectional wheels
- **Protection:** Perimeter rubber bumpers
- **Net weight:** 22 kg
