

Service trolley with 2 reinforced shelves h314_160

18/10 stainless steel service trolley with reinforced structure, 500 kg capacity and 150 mm wheels. Ideal for heavy loads in sterile environments.

The **h314_160** service trolley is a professional piece of equipment designed for the intensive handling of heavy loads in contexts where structural strength and hygiene are essential requirements. The structure, made entirely of **18/10 stainless steel** with 25x25 mm AISI tubulars, guarantees superior stability and a long operational life even in the presence of moisture or corrosive agents, making it ideal for large kitchens, pharmaceutical laboratories, and hospital departments.

Technical specifications

- **Material:** 18/10 stainless steel (AISI 304) with 25x25 mm tubular frame.
- **Loading shelves:** Surfaces with recessed folding, welded directly to the frame and internally reinforced to prevent deformation.
- **Handling system:** 4 swivelling wheels with a diameter of 150 mm, designed to reduce pushing effort.
- **Protections:** Corner bumpers in non-marking grey rubber for the protection of walls and machinery.
- **Dimensions:** 1160 x 610 x 950 (h) mm.
- **Load capacity:** Certified maximum capacity of approximately 500 kg.
