

Service trolley with double bag hole h09_216

AISI 304 stainless steel service trolley for table clearing, 110x60x94 cm, with 2 waste bag holes and non-marking multidirectional wheels.

The professional service trolley **h09_216** is specifically designed to optimize table clearing and resetting operations in catering and hotel contexts. Entirely made of **AISI 304 stainless steel**, it guarantees the highest standards of hygiene and superior resistance to corrosion and daily wear. The two-shelf configuration is enriched by a top surface with **two integrated holes** for the insertion of waste bags, allowing operators to separate waste directly while collecting tableware.
