

Service trolley with tray shelves h09_259

Professional service trolley in AISI 304 stainless steel with 3 soundproof shelves, dimensions 90x60x104 cm and structural capacity of 100 kg.

The **h09_259** service trolley is a technical solution designed for professional handling in contexts requiring high hygienic standards and structural robustness. Made entirely of **AISI 304 stainless steel**, the trolley features a 25 mm diameter tubular structure that ensures stability even when fully loaded. The three shelves are pressed in a tray shape with high-thickness rounded edges, a configuration that prevents items from accidentally falling and facilitates the containment of any spilled liquids.

The satin finish and the **soundproofing system of the shelves** make this tool ideal for environments where acoustic comfort is a priority. Movement is handled by four large-diameter (125 mm) multidirectional wheels, integrated with rubber corner bumpers to preserve the integrity of walls and furniture during transit.

Technical specifications

- **Material:** high-quality AISI 304 stainless steel
- **Structure:** tubular with 25 mm diameter
- **Configuration:** 3 pressed tray-shaped shelves
- **Shelf dimensions:** W.80 x D.50 cm
- **Total dimensions:** W.90 x D.60 x h.104 cm
- **Sliding system:** 4 multidirectional wheels $\varnothing$ 125 mm
- **Protection:** integrated rubber bumpers
- **Maximum capacity:** 100 kg distributed
- **Distinctive feature:** soundproof shelves and rounded edges
