

Serving trolley with 3 shelves h314_62

Professional stainless steel service trolley with 3 walnut laminate shelves, 950x510x1020 mm, ideal for quiet and safe transport. The **catering service trolley h314_62** is a technical tool designed to optimize the transport of dishes, food, and equipment between different operational environments. The combination of the **stainless steel load-bearing structure** and the shelves with aesthetic finish makes it suitable not only for kitchens, but also for direct service in the dining room, where aesthetics must integrate with professional functionality. The 20x20 mm square tube structure guarantees dimensional stability even at full load, while the laminate surfaces are specifically treated to resist chemical agents and acidic substances common in the food sector.

Technical specifications

- **Frame material:** Stainless steel with 20x20 mm square tube
- **Shelves:** 3 acid-resistant laminate shelves in walnut color
- **Total dimensions:** W.950 x D.510 x H.1020 mm
- **Useful shelf surface:** 840x440 mm
- **Movement system:** 4 non-marking grey rubber swivel wheels Ø 125 mm
- **Protections:** Perimeter soft rubber bumpers
- **Load capacity:** Maximum capacity approximately 90 kg
- **Operating weight:** approx. 19 kg
