

Set of 3 Soft educational blocks h999_02

Set of 3 psychomotor blocks for children 6-18 months. Dimensions: W. 60 x D. 60 x H 25 cm. High-density foam and PVC coating.

The **set of 3 soft educational blocks h999_02** is designed to foster the psychomotor development of children aged **6 to 18 months**, during a fundamental stage of growth. Designed for use in **preschools, nurseries, and educational centers**, these elements offer an ideal combination of **safety, comfort, and motor stimulation**.

Each block is made of **high-density foam**, which ensures excellent support during play and motor activities. The covering is in **antibacterial and non-slip PVC**, easy to clean and bite-resistant, designed for environments frequented by small children.

Thanks to the variety of **bright or neutral colors**, the set integrates perfectly into any educational setting, stimulating the child's visual perception and also offering opportunities for color learning. The design is intended for the child's spontaneous interaction with the environment, facilitating **rolling, climbing, crawling, and motor coordination**.

This set represents a **modular base** that can be used individually or in combination with other soft modules to create **psychomotor paths** or multisensory play areas.

Choose the h999_02 set to promote a harmonious development of the motor, cognitive, and relational skills of the little ones in a safe and controlled environment.

Shape a stimulating and safe educational environment for your young students. **Order the h999_02 set now or contact us for personalized advice on designing psychomotor spaces!**

FAQ:

1. **For what age group are these blocks intended?**
They are designed for boys and girls from 6 to 18 months.
2. **Are they easy to clean?**
Yes, the PVC coating is washable and antibacterial, perfect for frequent use.
3. **Are the blocks rigid enough to support the child?**
Yes, thanks to the high-density foam, they offer support and safety during activities.
4. **Are they suitable for use in public environments such as schools or nurseries?**
Absolutely yes, they comply with European safety regulations for childhood.
5. **Are the dimensions suitable for small spaces?**
Yes, the blocks are compact and modular, also ideal for small educational environments.

Mini buying guide:

When selecting products for **infant psychomotricity**, it is essential to consider key aspects such as **safety, quality of materials, ease of hygiene**, and **sensory stimulation**. Soft blocks like the model **h999_02** are designed for children aged **6 to 18 months**, a crucial period for motor and cognitive development.

The set is made with **high-density foam**, which guarantees support but remains soft enough to cushion bumps and falls. The **antibacterial PVC** coating is ideal for frequent use in environments such as **nurseries, kindergartens, or educational centers**, where hygiene is a priority.

The format **consisting of 3 modular blocks** allows you to organize the space according to needs: you can create **motor paths**, relaxation zones, or safe play areas. The bright colors, selectable from numerous shades, also stimulate **visual perception and color recognition ability**.

Choosing the h999_02 model favors movement, coordination, and independent discovery in a protected environment designed for the little ones. Suitable for all facilities that want to create **educational, safe, and functional spaces**.
