

## Shelf in stainless steel 4 smooth shelves 130x40xh180 cm h11124

Shelves 4 smooth shelves in AISI 304 stainless steel frame with a hook. Italian product.

Shelving in stainless steel AISI 304, a particular type of stainless steel constituted by a particular mix of chromium, carbon and nickel. This means that the shelf is characterized by:

- high resistance to corrosion
- ease of cleaning
- excellent health coefficient
- ease of processing
- excellent durability

The structure is modular to hook on uprights "U" 40x25x40 thickness of 20/10. The assembly is easy thanks to the hook system of slots in the punch which improves the stability. The shelves are smooth, the thickness of 8/10.

The shelving is provided with transverse reinforcement and plastic feet to avoid damage of the bearing surfaces.

Safety is ensured by anti-cut edges while the view is gratified by the glossy finish.

Specifications:

- material: stainless steel AISI 304
- 4 smooth shelves
- thick shelves 08.10
- uprights thickness of 20/10
- with crosshead reinforcement
- plastic feet
- anti-cut edges
- glossy finish
- height 180 cm
- width 130 cm
- depth 40 cm
- Italian product
