

Shock-absorbent flooring h929_01

Shock-absorbent flooring for play areas made of recycled rubber granules. Dimensions: 50 x 50 cm.

Anti-shock tile for the creation of **safety flooring** in playgrounds, play areas and nurseries. Composed of **recycled rubber granules** from **end-of-life tires** agglomerated with **polyurethane resins** and colored pigments. The safety tile is fixed by **direct laying** on a perfectly flat surface or by gluing. For **cleaning the tile**, the surface can be swept with **standard tools**.

Technical features:

- Dimensions: 50 x 50 cm
- Thickness: 4 cm
- Available in various colors
- Material: recycled rubber
- Quickly removable and transferable
- Stable and easy-to-install locking pins
- Draining
- Protection of underlying surfaces
- Absorption of impact, noise, vibration and footfall
- Easy to clean
- High-comfort surfaces
- Non-toxic
- Compliant with standards: UNI EN 1177:2019 and UNI EN 71-3:2017
