

## Shock-absorbent tile 100x100 h620\_13

Safety flooring for weight rooms. Dimensions: 100 x 100 cm. Thickness: 20 mm.

**Shock-absorbent flooring** perfect for setting up gym weight rooms or other sports furnishing surfaces. Designed to ensure **excellent shock and impact absorption**, preventing possible microtraumas or microfractures to athletes. Its structure in **recycled rubber** makes the surface **smooth and non-slip**. It does not damage the underlying floors, on the contrary, it protects them, thanks to its **draining and permeable power**.

### *Technical features:*

- Dimensions: 100 x 100 cm
- Material: recycled rubber granules and powder from end-of-life tires
- Fixing: direct laying and/or gluing
- Minimum purchasable quantity 2 pcs (2 sqm)
- Available in different colors
