

Shoe dryer h1034_01

Wall-mounted shoe dryer for 5 pairs in stainless steel, hot water system. Dimensions: W 29 x D 48 x H 200 cm.

The **H1034_01 shoe dryer** is a **professional shoe dryer panel** designed for intensive use in **HORECA environments**, accommodation facilities in mountain areas, **barracks, ski centers, alpine huts** and **fire departments**. Built **entirely in stainless steel**, it is an extremely **corrosion-resistant, easy-to-clean** and **hygienic** product, suitable for contexts where it is necessary to guarantee high performance in terms of **drying** and **durability**.

The H1034_01 model is equipped with **continuously bent rounded brackets**, which avoid any pressure points and ensure **uninterrupted circulation of hot water**. This particular shape guarantees constant and homogeneous heating, **without cold zones**, preventing the brackets from cooling down and ensuring effective drying right to the tip of the shoe.

Thanks to the **connection to the hot water heating system with technical plumbing intervention** via 1/2" connections, it does not require an electrical connection. The system works optimally with a constant flow temperature between **35°C and 40°C**.

Operation is **ecological**, without electricity consumption, and **completely maintenance-free**. The design guarantees **stability** and prevents footwear from tilting sideways or downwards. It is also compatible with **children's shoes** and **gloves**, making it a flexible system for different needs.

Guests will find **dry, warm and comfortable shoes** every day, ready for use, significantly improving the experience in hotel facilities or operational contexts.

Buy the **H1034_01 stainless steel shoe dryer** now for your facility! Contact us for a personalized quote on multiple supplies and discover the conditions reserved for hotels, barracks and sports centers.

Technical characteristics:

- **Structure:** in stainless steel
- **Capacity:** 5 pairs of shoes
- **Use:** adult shoes, children's shoes and gloves
- **Dimensions:** W 29 x D 48 x H 200 cm
- **Power supply:** connection to hot water system (requires plumbing intervention)
- **Connections:** 1/2"
- **Recommended flow temperature:** 35–40°C
- **Mounting:** wall-mounted
- **Maintenance:** free
- **Warranty:** 5 years
- **System:** continuous rounded brackets for fluid water circulation

Benefits for the user:

- **Drying:** fast and uniform thanks to constant water circulation.
- **No electrical consumption:** ecological and economic system.
- **Boots:** and gloves always dry, even at the tips.

- **Structure:** stable and safe, prevents shoes from tilting.
- **Usable:** simply even for children's shoes and gloves.

FAQ:

1. **Is it compatible with any heating system?**

Yes, the panel is compatible with hot water systems that support a temperature between 35 and 40°C and connects via plumbing intervention with 1/2" connections.

2. **Does the product require maintenance?**

No, the system is completely maintenance-free, it does not require internal cleaning or parts replacement.

3. **Can I install it in humid environments or in contact with snow?**

Yes, being made entirely of stainless steel, it is ideal for humid environments and for use in mountain areas subject to cold, snow or water.

4. **Is it also suitable for small shoes or gloves?**

Yes, the structure is designed to accommodate not only adult boots, but also children's shoes and gloves.

5. **Is electricity needed to make it work?**

No, the panel works solely through connection to the hot water system and does not require an electrical connection.

Short buying guide:

If you manage a hotel, a barracks or a refuge in mountain areas, choosing a professional shoe dryer is a strategic choice. Always evaluate the **capacity** (number of pairs to be dried simultaneously), the type of **power supply** (hot water or electric), the **materials** (stainless steel for durability and hygiene), and **maintenance**. The H1034_01 model responds perfectly to all these needs: it is **ecological, resistant, wall-mounted** and **completely maintenance-free**, perfect for daily and intensive use in professional contexts.
