

## Shopping center trampoline 2 stations h1018\_03

2-station inline trampoline without corridor, galvanized structure and safety netting. Dimensions: 266 x 604 x H 352 cm.

The **H1018\_03 2-station inline trampoline**, without corridor, is designed for professional use in high-traffic public contexts, such as **shopping centers, indoor/outdoor play areas, recreational parks or tourist facilities**. Made with resistant and compliant materials, it combines **safety, reliability and high bounce performance** in a compact and well-organized space.

The **main structure is made of hot-dip galvanized steel**, a solution that guarantees **exceptional resistance to atmospheric agents and wear** even in humid or corrosive environments. The bounce system consists of **27 cm pre-galvanized steel tension springs**, combined with **reinforced nylon elastic mats** in yellow, for a **high and controlled bounce**.

Each station is equipped with a **180 x 180 cm** elastic mat, separated and protected along the perimeter by **4x4 cm square mesh safety nets**, made with soft and ultra-resistant thread to ensure **maximum safety during use**.

The **fire-retardant PVC perimeter cushions**, padded with 10 cm high-density foam, protect against any impact. The bottom is closed by a **lower aesthetic cover** in metal mesh covered by fire-retardant PVC. Access to the activity is guaranteed by a **user door made from a slit in the net**, with **Teflon clips** for a secure but easily opened closure. For maintenance work, there is a **dedicated door integrated into the aesthetic cover**.

The **access ladder** is made of metal with **steps in wood treated for outdoor use**, dimensions 180 x 80 cm, robust and safe. Supplied with **installation, use and maintenance manual**, a **logbook** for operational management is also included. **Upon request and subject to a quote**, it is possible to receive **assembly service** and **supply of the ministerial code** for installation in public spaces.

Choose the **H1018\_03 trampoline** to make your shopping center or recreational space a safe and fun area. Contact us for a tailor-made quote and for information on assembly and ministerial certification.

### Technical specifications:

- **Stations:** 2 inline
- **Total dimensions:** 266 x 604 x H 352 cm
- **Structure:** hot-dip galvanized steel
- **Screws:** anti-corrosion galvanized
- **Springs:** 27 cm length, Ø 3 cm, pre-galvanized steel
- **Elastic mats (jumping):** reinforced nylon, yellow color, 180 x 180 cm
- **Perimeter nets:** 4x4 cm mesh, soft ultra-resistant thread
- **Protective cushions:** fire-retardant PVC + 10 cm high-density foam
- **Lower cover:** metal mesh + fire-retardant PVC
- **User access:** slit in the net with Teflon clip closure
- **Maintenance access:** door with slit in the aesthetic cover
- **Access ladder:** 180 x 80 cm, metal + treated wood
- **Warranty:** 1 year international
- **Equipment:** use and installation manual and logbook
- **On request:** professional assembly and ministerial code

### User benefits:

- **Double:** jumping station for a greater flow of users.
- **Structure:** solid and durable, suitable for intensive use.
- **Maximum:** safety with protective nets and fire-retardant cushions.
- **Entrance:** maintenance made easy with dedicated access.
- **Ideal:** for shopping centers, playrooms, campsites and public areas.

#### FAQ:

1. **Is this trampoline suitable for commercial use?**

Yes, it was designed for high-traffic public areas, such as shopping centers and parks.

2. **Is it possible to obtain certification for public use?**

Yes, upon request and subject to a quote, we provide the ministerial code necessary for approval in public environments.

3. **Is assembly included?**

Assembly is not included, but can be requested subject to a quote.

4. **How is the trampoline accessed?**

Users enter through a slit in the net with Teflon clips, safe and easily manageable.

5. **Does it need frequent maintenance?**

Periodic checking of springs, nets and cushions is recommended, but the product is built to last over time with ordinary maintenance.

#### Mini purchase guide:

The **H1018\_03 2-station inline trampoline** is perfect for **high-traffic contexts**, where it is necessary to guarantee **maximum safety and continuity of use**, but with **limited footprint**.

Without a corridor, it allows for greater space optimization while maintaining a **safe separation between the two users**.

Ideal for those who manage **shopping centers, tourist villages or public areas**, and are looking for professional equipment compliant with regulations and ready for use, with the possibility of **customization and assembly service on request**.
