

Signage stand h738_128

Signage stand with a robust aluminum structure with 4 customizable slats for indications in outdoor areas. Total dimensions: W 1340 x D 45 x H 1500 mm.

The **modular outdoor signage stand h738_128** is a versatile and resistant solution, perfect for guiding and directing the public in open spaces such as parking lots, gardens, companies, hospitals, supermarkets, and museums. Thanks to its structure made of **2 uprights in anodized aluminum** and **4 customizable slats in extruded aluminum**, it offers maximum durability and personalization, effectively resisting atmospheric agents. This makes the stand suitable for intensive use in outdoor environments, where it is necessary to provide clear and permanent indications.

Its modular construction allows it to be adapted to different needs, both in terms of size and number of panels. The customizable **slats** can be easily inserted into the sliding uprights, thanks to a fixing system with **locking pins** that makes them secure and easy to replace in case of updates or changes. The linear and modern design of the stand, with a **gothic gray** finish, integrates perfectly with any architectural context, ensuring a professional and tidy appearance.

The stand is supplied with **painted steel bases**, equipped with holes for ground fixing, to ensure stability on hard surfaces such as asphalt or concrete. Alternatively, for a more stable installation on soft ground, **underground brackets** are available to firmly anchor the structure to the ground. This double mounting option ensures that the stand can be installed in any outdoor context, satisfying different needs.

Thanks to its high **customization** and resistance, this signage stand is ideal for improving orientation in outdoor areas and ensuring effective management of people flows. The **upright dimensions** are W 70 x H 1500 x D 45 mm, while the panels measure W 1200 x H 200 x D 20 mm and can be configured in height and number based on specific needs.

Used to provide information, directional indications, or promotions, this **modular stand** is perfect for creating guided paths, signaling entrance or exit areas, and making specific zones like parking lots, company entrances, or tourist information easily identifiable.

Choose the **modular outdoor signage stand** to better organize outdoor spaces and guide visitors in a clear and professional way. This **h738_128** stand is designed to withstand the most difficult weather conditions, always maintaining an elegant and functional appearance.

Customize the panels according to your needs and choose the most suitable fixing system between steel bases or underground brackets. **Don't wait!** Buy now and improve the visibility of your outdoor signs, or request a **personalized quote** now for large quantities and custom-made projects.

User benefits

- **Modular structure** for maximum customization

- **Resistant materials** for long-lasting outdoor use
- Easily interchangeable and customizable panels
- **Secure fixing** with steel bases or underground brackets

FAQ

- **Can I customize the panels?**

Yes, the extruded aluminum panels can be customized on both sides.

- **How is it fixed?**

The stand can be fixed to the ground with painted steel bases or with underground brackets.

- **Is it suitable for all weather conditions?**

Yes, thanks to resistant materials such as anodized aluminum, the stand is suitable for outdoor use.

Mini buying guide:

To choose the **perfect modular signage stand**, consider the following options. If you have a rigid surface such as asphalt or concrete, the painted steel bases with holes are ideal for secure fixing. Alternatively, if the ground is soft (gardens, parks), the underground brackets offer greater stability. Customize your signage by choosing the number of **aluminum slats**.

More slats offer greater visibility and space for information. The extruded aluminum slats are perfectly customizable on **both sides**, allowing you to insert indications or company logos. Thanks to high-quality materials such as anodized aluminum, this **h738_128** stand is perfect for continuous outdoor use, resisting rain, wind, and sun without losing aesthetics or functionality.
