

Single bed for barracks and prisons h1033_27

Steel single bed for barracks and prisons (209x99.5x95 cm). Modular structure with 150 kg load capacity, steel mesh and no sharp edges.

The **single bed for barracks and prisons h1033_27** is a modular system designed to provide a solid, functional, and easy-to-use sleeping station within collective facilities. Geared towards managers of school dormitories, penitentiaries, and military logistics hubs, this device addresses the need to furnish high-density dorms with durable, safe elements capable of withstanding continuous heavy loads. The structure stands out for the total absence of sharp edges and for engineering rigorously tested for intensive use, capable of guaranteeing a balanced and silent setup that eliminates vibrations and annoying mechanical squeaks during sleep.

Technical features

- **Type:** Modular single bed for collective facilities
- **Overall dimensions (W x D x H):** 209 x 99.5 x 95 cm
- **Product weight:** 34 kg
- **Sleeping surface:** Steel mesh for uniform support and optimal mattress ventilation
- **Maximum load capacity:** 150 kg per bed space
- **Structural safety:** Design completely free of sharp edges
- **Mechanical hold:** Solid, balanced, and silent assembled structure (no vibrations or squeaks)
