

Single bowl stand for operating room h736_03

Surgical stainless steel bowl stand with 6-liter bowl, push handle and 5 swivel castors for maximum mobility in the operating room.

The h736_03 operating room bowl stand is a professional device designed for the safe and hygienic management of solutions, biological fluids, and dressing materials during surgical procedures. Entirely made of **stainless steel** with joint-free welds, the support guarantees maximum corrosion resistance and deep sanitization, complying with rigorous hospital aseptic protocols.

The structure is optimized for the dynamics of the operating block: the presence of an ergonomic push handle and a system of **five swivel castors** ensures smooth and precise movement. The base configuration is designed to offer superior stability, reducing the risk of tipping during liquid transport.

Technical features

- **Material:** High-resistance stainless steel with electro-polished finish.
- **Components:** Removable stainless steel bowl included.
- **Bowl dimensions:** Outer diameter 320 mm.
- **Capacity:** 6 liters.
- **Mobility system:** 5 swivel castors Ø 75 mm, resistant to abrasion and chemical agents.
- **Safety:** 2 castors equipped with foot brakes for locking in position.
- **Total dimensions:** 635 x 670 x 865 mm.
- **Weight:** 4 kg.
