

Single-channel surgical sink h601_76

Single-channel surgical sink with protective back panel and clinical flex lever mixer. 20 cm deep bowl, 20 cm backsplash. Dimensions: W 100 x D 50 x H 47 cm.

The **h601_76 single-channel surgical sink** is high-level medical equipment, designed for operating rooms and medical environments that require superior wall protection during washing procedures. This model is distinguished by the presence of a **20 cm high back (backsplash)**, which acts as an effective barrier against water splashes. It is equipped with a **clinical flex lever mixer**, which can be operated by elbow to maintain hand sterility. The sink includes a **20 cm deep bowl**, ideal for surgical arm washing, and comes complete with a drain and **pull-out spray head** for maximum versatility of use.
