Single-place oxygen cylinder trolley h5536

Oxygen cylinder trolley with double strap, central bar, 2 pneumatic wheels Ø260, acrylic coating, load capacity 100 kg.

The **oxygen cylinder trolley** is an essential tool for healthcare facilities such as hospitals, clinics and nursing homes. It allows for the safe and easy transport of oxygen cylinders through a robust and functional structure, reducing the physical effort of healthcare personnel during movements within the facilities.

The design includes a **double containment strap** that securely fastens the cylinder, combined with a **central bar** that provides additional support during transport. The ergonomic handle and the push bar facilitate manoeuvres in tight spaces and on flat surfaces. The structure is **painted with acrylic powders in blue RAL 5015**, ensuring durability and easy sanitisation.

Technical features

- Compatibility: Ø 370 cylinders
- Pneumatic wheels Ø 260 (2 units)
- Maximum load capacity: 100 kg
- Self-weight: 13 kg
- Double cylinder containment strap
- Adjustable strap height: 253–510 mm
- Central support bar
- Push handle
- Ergonomic grip
- Coating: acrylic powder painting
- Colour: Blue RAL 5015
- Overall dimensions: H 1250 × D 400 × W 700 mm
