

Single school desk h908_16

Professional single-seater desk in Ø40 mm steel, 70x50 cm, with height-adjustable legs to adapt to different age groups and educational contexts.

This **single-seater desk** is designed for educational and training environments requiring maximum versatility and structural robustness. The load-bearing structure in tubular steel ensures long-lasting stability, while the **telescopic adjustment** system allows the workstation to be configured according to the user's anthropometric needs. This feature effectively solves the problem of ergonomic adaptation in multi-age contexts, guaranteeing correct posture from primary school to adult training.

Technical features

- **Structure:** high-quality tubular steel with a diameter of 40 mm.
