

Single-seater desk for high school h908_07

Single-seater school desk size 4 in steel and laminate, dimensions 70x50x64h cm. Robust structure without under-top shelf for educational classrooms.

The **single-seater school desk** is a technical furnishing solution designed for setting up classrooms in **secondary schools** and vocational training centers. The supporting structure is made of **steel tubing** with a diameter of 28 mm, dimensioned to ensure high stability and resistance to prolonged mechanical stress. This model is distinguished by an essential configuration **without an under-top shelf**, a choice that promotes greater ergonomic freedom for the user's legs and drastically simplifies the cleaning and sanitization operations of common areas.
