Single-section tilt table for cardiological examination h581_17

Single-section tilt table, fixed height 50 cm, electrically adjustable tilt 0°-90°, three patient restraint straps, fixed footrest, max load 150 kg.

The tilt table is a medical device designed for **examinations and treatments in varying positions**, with particular focus on patient stability and control. Ideal in rehabilitative, physiotherapeutic, and diagnostic contexts where it is necessary to **modify the patient's inclination in a smooth and controlled manner**, the table allows the passage of mechanical patient lifts, ensuring compatibility with handling aids.

Constructed with **certified Class 1 I M fireproof padding and upholstery**, it ensures regulatory compliance in healthcare environments. The mobile structure on four wheels (two lockable) facilitates positioning in different work areas.

Technical features

- **Fixed height:** 50 cm
- **Tilt adjustment:** electric, range 0°–90°, controlled by hand pendant
- **Wheels:** 4 wheels diameter 125 mm, 2 of which are lockable
- **Restraint systems:** 3 patient restraint straps (height 5 cm)
- **Footrest:** fixed and single
- **Padding:** density 30 kg/m³, thickness 40 mm
- **Upholstery:** Class 1 I M fireproof
- **Dimensions:** 190 × 65 × 50 cm (length × width × height)
- **Maximum workload:** approximately 150 kg
- **Control:** electric hand pendant for tilt adjustment
- **Accessibility:** designed to allow the passage of mechanical patient lifts
