

Six-slice capacity toaster h83317

Professional stainless steel 6-slice toaster with timer and crumb tray. Dimensions: W 43 x D 25 x H 22 cm.

The **H83317 professional toaster** is designed to guarantee **high performance and maximum reliability** in high-flow contexts such as **hotels, breakfast buffets, canteens, restaurants and bars**. Thanks to its **capacity of up to 6 slices**, it is the perfect choice for kitchens that must serve multiple customers simultaneously, maintaining **toasting speed and uniformity**.

The **stainless steel** structure gives the product a solid and professional aesthetic, combined with a **retro design** that also fits perfectly in visible self-service stations. The **slots can be partially activated (2, 4 or 6 slices)** via a selector, optimizing consumption and efficiency based on the number of portions to be prepared.

Equipped with an **adjustable timer from 1 to 5 minutes** and a **red indicator light**, the H83317 toaster allows for precise control of the browning degree. The **manual lift lever** allows for safe and controlled removal of slices, without sudden ejections.

The **removable crumb tray** makes cleaning fast and hygienic, while the **non-slip rubber feet** keep the toaster stable even during intense use. With a **power of 2570 W**, it guarantees professional results, ideal for continuous use.

Order the **H83317 toaster** now for your professional kitchen or request a personalized quote for Ho.Re.Ca. supplies. Reliability, efficiency and style for your breakfast service!

FAQ:

1. How many slices of bread can it toast at the same time?

It can toast 2, 4 or 6 slices, based on the selection made via the knob.

2. Is the timer adjustable?

Yes, from 1 to 5 minutes with indication via a red light.

3. How does the lift lever work?

The lever is manual, allowing you to control the extraction of the toast in total safety.

4. Is it suitable for self-service use?

Absolutely yes. The retro design, simple functions and stable structure make it perfect for breakfast buffets and self-service.

5. How is cleaning performed?

Remove the crumb tray, wash it with hot water and mild detergent. Clean the exterior with a damp cloth and dry.

Mini buying guide:

When choosing a toaster for a professional business, it is essential to evaluate **capacity, power and structure**. The H83317 model is perfect for kitchens that need to handle a **high number of portions**, offering **up to 6 toasts simultaneously** with a **power of 2570W**.

Ensure that the device has an **adjustable timer**, a **manual lift lever** for safety, and a **removable crumb tray** to facilitate cleaning. The design and robustness of stainless steel make it a long-lasting investment suitable for all kitchens in the **Ho.Re.Ca.** sector.
