

Slanted display for fruit and vegetables h757_29

Slanted fiberglass stand with reinforced structure. Dimensions: W 120 x D 120 x H rear leg 90 cm and H front leg 50 cm.

The **slanted fruit and vegetable display H757_29** is a professional technical stand designed for the neat and safe arrangement of fruit, vegetables and flowers in markets, trade fairs and street vending contexts. Compact in size yet extremely stable, this stand is designed to offer **optimal product visibility** and long-term durability.

The structure is made with a **resistant 35x20 mm tubular profile** and **50 mm oval tubes**, elements that give the stand **solidity and strength**, even with frequent loads. The **legs with a 98° angled opening** guarantee **high structural stability**, ideal for use on surfaces that are not perfectly regular.

The top is made of **blue heat-bonded fiberglass**, a material that is **easy to clean, hygienic and resistant** to atmospheric agents and wear, perfect for food displays. The model shown in the photos does not include the fiberglass, but the **fiberglass** is nevertheless **included in the supply** of this **model**.

The stand is **assembled via bolts** and is equipped with **special hinges**, which facilitate its assembly and make it suitable for daily use. The **rounded die-cast aluminum corners** ensure high safety during use, preventing accidental bumps.

Thanks to its inclination — achieved through a height difference between the rear leg (90 cm) and the front one (50 cm) — this display offers an **orderly and easily accessible presentation of products**, improving both the organization of the display space and the customer's shopping experience.

Buy now the **slanted display H757_29** with fiberglass: perfect for an effective and safe exhibition. Request a personalized quote for multiple orders.
