

Small parts workshop cabinet h972_42

Steel workshop cabinet with 40 x 4L polypropylene bins. Dimensions 760x260x1600 mm. Equipped with lockable doors for secure storage.

The **small parts workshop cabinet h972_42** represents a professional solution for the management and protection of small components in industrial, artisanal, and logistical contexts. The **load-bearing steel structure** ensures the necessary mechanical stability for intensive use in workshops, warehouses, and laboratories, protecting the contents from dust, impacts, and external agents.

The internal storage system is configured for maximum operational efficiency: the **40 polypropylene bins of 4 liters** each allow for a systematic subdivision of screws, bolts, and electronic components. The presence of **hinged doors with a key lock** raises the security standard, allowing for access control to valuable materials or critical stock.

Technical specifications

- **Structure material:** Steel with wear-resistant finish
- **Bin material:** High-density polypropylene
- **Color:** Gray/Blue combination
- **Overall dimensions:** W 760 x D 260 x H 1600 mm
- **Empty weight:** 60 kg
- **Internal capacity:** 40 removable bins of 4 liters each
- **Shelf capacity:** 8 kg per single shelf (uniform distribution)
- **Locking system:** Doors with cylinder lock and key
- **Configuration:** Supplied in assembly kit with technical instructions included
