

Smart bench for urban furniture h338_42

Smart bench with 60W photovoltaic module, 2 USB ports, 20W LED lighting and internal cooling system.

Smart urban furniture bench, with a **modern and innovative design**, made of **reconstituted stone** and available in **different colors**. Equipped with a **60W monocrystalline photovoltaic module** that makes it **independent from the power grid**. This model includes **2 USB ports** for charging devices up to 2 A and wireless charging; **external environment temperature and humidity sensors**; **internal cooling system**; **0.36 kWh AGM batteries**; **230V AC backup charging transformer**. The bench is also equipped with **20W LED lighting directed towards the ground**. **Does not require ground fixing** and is resistant and durable over time.

Technical features:

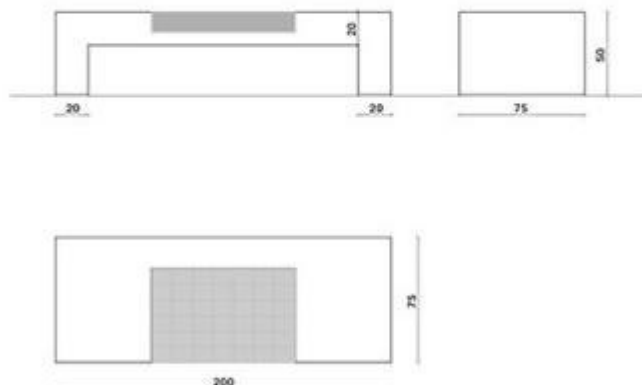

- Dimensions: L. 200 x D. 75 x H. 50 cm
- Weight: approx. 600 kg
- Construction material: reconstituted stone
- Equipped with 60W monocrystalline photovoltaic module
- 2 USB ports
- 20W LED lighting directed towards the ground
- Internal cooling system
- External environment temperature and humidity sensors
- 0.36 kWh AGM batteries
- 230V AC backup charging transformer
- Electrical protection: IP67
- Does not require ground fixing
- Multiple colors available
