

Smooth double adjustable posture mirror h731_60

Smooth double adjustable mirror for postural exercises. Dimensions: W. 100 x D. 2 x h. 200 cm.

Ideal device for performing postural education exercises, allowing a global view of the patient's posture. The structure consists of **two large adjustable mirrors** which, positioned to form a 45° angle, **allow a three-dimensional view**, meaning the patient can observe themselves simultaneously from both the front and the side. **Painted and hinged steel structure**. The intended **fixing is wall-mounted**. The structure is equipped with **wheels** that allow the mirrors to be oriented, which close like a book.

Technical features:

- Double mirror
- Adjustable
- Type: smooth
- Dimensions: W. 100 x D. 2 x h. 200 cm
- Frame material: painted steel
- Hinged structure
- With wheels to orient the mirrors
- Fixing: wall-mounted
