

Smooth postural gymnastics mirror 100x170 cm h581_54

Smooth mirror for postural exercises. Thickness: 4 mm. Dimensions: 100 x h. 170 cm.

Postural gymnastics mirror used by physiotherapists and specialists within physiotherapy and rehabilitation centers. Model with **smooth surface** to be positioned **on the wall or on transportable and adjustable trolleys (trolleys are not included in the supply)**. The structure guarantees **maximum safety** thanks to the presence of an **accident-prevention film** that allows glass fragments to be held in case of collision and breakage of the mirror. Composed of an **aluminum profile** that supports the mirror complete with film, previously glued onto a **polystyrene panel finished with a white MDF one**.

Technical features:

- Type: smooth
- Dimensions: 100 x h. 170 cm
- Thickness: 4 mm
- Weight: approximately 30 kg
- With accident-prevention adhesive film
- Mirror material: glass
- Structure with polystyrene panel finished with a white MDF panel + aluminum profile
- To be positioned on the wall or on transportable trolleys (trolleys not included)
