

Soap dispenser with sensor in polished chrome brass h40_66

Automatic wall-mounted soap dispenser in chrome-plated brass, 1.5 L. Infrared technology for touchless dispensing and dual mains/battery power supply.

The h40_66 electronic soap dispenser represents a professional solution designed to ensure high hygiene standards in high-traffic environments. Made of **polished chrome brass**, the device combines superior structural robustness with a minimal design, facilitating integration into modern architectural projects. The automatic dispensing system via **infrared sensor** eliminates the need for physical contact, effectively preventing cross-contamination between users.

The onboard electronics allow for precise detergent management, with an adjustable dispensing between 0.5 ml and 2 ml per single cycle, promoting operational cost control and waste reduction. Versatility is guaranteed by compatibility with liquid soaps of different densities and the flexibility of the power supply system, which can be via connection to the electrical mains or through batteries.

Technical specifications

- **Material:** high-resistance polished chrome brass
- **Installation:** wall mounting
- **Tank capacity:** 1.5 liters
- **Dosage:** adjustable from 0.5 to 2 ml
- **Fluid compatibility:** viscosity between 100 and 3,500 cP, neutral pH
- **Power supply:** electrical mains or batteries (not included)
- **Technology:** infrared proximity sensor

Options: upon request, the device can be supplied with custom finishes subject to a quote.
