

Soft psychomotor arch-shaped rocker h999_08

Arch-shaped rocker in soft foam. Covered in antibacterial PVC. Dimensions: W. 120 x D. 30 x h. 60 cm. Age: 3-6 years.

The **soft arch-shaped rocker** is a psychomotor tool designed for **children aged 3 to 6 years**, designed to promote **active movement, balance and coordination** in the first years of preschool. It is perfect for use in **nurseries, preschools, children's gyms** and spaces dedicated to psychomotor development.

Made of **high-density foam (25 kg/m³)**, the rocker ensures a **stable but comfortable** seat, with a coating in **antibacterial, bite-resistant** and **easy to clean** polyester PVC. The particular arched shape allows the child to **rock safely**, developing **static and dynamic balance, motor control** and **awareness of their own body in space**.

Thanks to the **limited height** and the **softness of the materials**, this rocker can be used in complete safety even during free play or structured paths. It is available in **various bright colors**, ideal for stimulating children's attention and interest, and easily integrates into modular motor paths with other elements.

Compliant with all **European safety standards** for products intended for children, the arched rocker represents an excellent choice for enhancing the motor skills of the little ones in a professional educational context.

Add the arch rocker to your psychomotor space! Contact us for offers on multiple supplies or customized solutions.

Technical characteristics:

- **Dimensions:** W. 120 x D. 30 x h. 60 cm
- **Internal material:** Foam density 25 Kg/m³
- **Coating:** Antibacterial and bite-resistant polyester PVC
- **Shape:** Curved arch for rocking activities
- **Recommended age:** From 3 to 6 years
- **Colors:** Available in various colors
- **Certifications:** Compliant with European standards for child safety
- **Cleaning:** Easy to sanitize with a damp cloth and neutral detergents
- **Use:** Indoor, for nurseries, schools, playrooms, educational centers

Benefits for the user:

- **Helps development:** of balance and motor coordination.
- **Stimulates movement:** active and controlled.
- **Promotes perception:** of the body in space.
- **Made with materials:** safe, antibacterial and resistant.
- **Easy to clean:** perfect for daily use in school environments

FAQ:

1. **From what age is the rocker recommended?**
It is suitable for children from 3 to 6 years.
2. **Is the rocker safe for intense activities or frequent use?**
Yes, it is made with compact foam and reinforced coating, perfect for daily use in school contexts.

3. **Is the product bulky?**

No, the dimensions (120 x 30 x 60 cm) make it manageable and easily integrated into psychomotor spaces.

4. **Is it suitable for use by several children at the same time?**

No, the rocker is designed for the use of only one child at a time, to ensure correct balance and safety.

5. **What activities can be carried out with the rocker?**

The arched rocker is perfect for balance exercises, controlled active play and vestibular stimulation, fundamental for motor development between 3 and 6 years.

Mini buying guide:

In the 3-6 years psychomotor segment, it is essential to choose tools that favor **dynamism of movement**, the **development of balance** and the **perception of the body schema**. The arched rocker represents one of the most effective solutions because it combines **ergonomic shape**, **safe materials** and **versatility of use**.

Unlike products for the youngest, in this age group children need more challenging stimuli, but always in a protected context. The curved structure allows for **controlled rocking** which improves coordination and the sense of balance, fundamental in this phase of growth.

It is important that the materials are **antibacterial**, **bite-resistant** and **easy to clean**, given the frequency of use in educational facilities. The compact shape also allows it to be easily positioned within complex psychomotor paths or multifunctional spaces.

Choosing this type of rocker means **investing in educational quality**, stimulating the child's motor, sensory and emotional skills, in a **safe, engaging and professional** context.
