

Soft wavy staircase for psychomotricity h999_12

Soft wavy staircase for psychomotricity in 25 kg/m³ foam, dimensions 65x60x30 cm. Antibacterial and non-slip coating for nurseries and schools.

The **soft wavy staircase h999_12** is a professional educational module designed for early childhood, specifically for children aged between **18 months and 3 years**. The particular wave geometry is designed to stimulate sensory and motor receptors, favoring the acquisition of dynamic balance and coordination during the ascent and descent phases. It represents a fundamental solution for the setting up of play-therapeutic areas where safety must be combined with cognitive stimulus.

Technical features

- **Dimensions:** W 65 x D 60 x H 30 cm
- **Inner core:** Polyurethane foam with a density of 25 kg/m³
- **Coating:** Antibacterial and bite-resistant technical fabric
- **Base:** Lower surface with high-grip non-slip finish
- **Age group:** Recommended from 18 months to 3 years
- **Certifications:** Compliant with current European regulations on the safety of toys and childcare articles
