

## Sound-absorbing divider with 4 panels and base with wheels h1033\_24

Mobile sound-absorbing divider in recycled polyester, 4 panels of 140x40 cm, height 179 cm. Certified solution for professional open spaces.

The **H1033\_24 sound-absorbing divider** is a modular system designed for dynamic segmentation and improvement of acoustic comfort in collective work environments. Designed for open spaces, operational departments, and temporary meeting rooms, this technical furniture element allows for the definition of private areas without resorting to masonry work, ensuring effective sound shielding and constant operational flexibility.

### Technical features

- **Configuration:** 4 double-sided horizontal panels arranged in series.
- **Panel dimensions:** W. 140 x H. 40 cm (each).
- **Total height:** approximately 179.4 cm.
- **Absorbent core:** thermoformed recycled polyester fiber with a patented fire-retardant honeycomb insert.
- **Finish:** stretch bi-elastic fabric covering with edges finished by high-precision laser cutting.
- **Structural support:** 80/10 thick metal base equipped with wheels for easy movement.
- **Fixing system:** 50/10 thick metal support diapason with screw housing for mechanical spacers.
- **Fire reaction certification:** complies with UNI EN 13501-1:2009 – Class B-s2,d0 (corresponding to Italian Class 1).
- **Colors:** base in RAL 7035 gray; panels available in various color variants.
