

Space-saving overhead maintenance cage h928_02

Foldable overhead maintenance work basket. Dimensions: W. 1200 x D. 1080 x H. 1910 mm. Maximum load: 300 kg.

The **work basket**, also known as an **aerial work platform**, represents a highly safe and functional solution for carrying out repair and maintenance work at height. Designed to ensure optimal safety during operations on buildings, machinery, ceiling lighting systems and more, this tool is **compliant with UVV accident prevention regulations**, ensuring total protection for the operator. The **sturdy steel structure** gives the basket excellent solidity, while the **non-slip work surface** ensures a safe and stable base even during the most demanding tasks. To avoid any risk of slipping, the basket is equipped with a **locking pin** that fixes it securely to the forks, preventing unwanted movements. For greater convenience, the basket **can be easily folded**, facilitating transport and storage in small spaces. It is **available in various RAL colors**, allowing you to choose the one that best suits your needs. With a **maximum load capacity of 300 kg**, this aerial work platform is designed to ensure a safe and stable working environment.

Technical features:

- Dimensions: W. 1200 x D. 1080 x H. 1910 mm
- Maximum load: 300 kg
- Weight: 130 kg
- Foldable
- Construction material: steel
- Non-slip work surface
- Locking pin
- Available in various RAL colors
- TÜV certification
- Compliant with the respective UVV accident prevention regulations
- Manufactured in compliance with BGVD 27 regulations
