

## Specialist blood collection chair h602\_04

Blood collection and therapy chair with three sections: seat, backrest, and legrest. Capacity: 200 Kg

**Specialist blood collection/donation chair** used, if necessary, also as a **multifunctional chair**. Chair with a **simple and comfortable design**, divided into **3 sections**: seat, backrest, and legrest. Chair equipped with **3 low-voltage electric motors** (24V-DC) to manage the following movements: **lifting, synchronized backrest and legrest movement, Trendelenburg**. Pair of **height-adjustable**, depth-adjustable, and laterally swivelling armrests; they are also upholstered in sky fabric. The chair can be used for **multiple diagnostic and therapeutic applications**. The **electric movements** are managed via a **handset control**. Frame made of high-quality **steel**, painted light grey. **Seat, backrest, and legrest** are padded and upholstered with soft **fire-retardant SKY fabric**, antimicrobial, antifungal, disinfectable, and highly wear-resistant. Base equipped with **4 wheels** of 125mm diameter (2 free and 2 lockable) both for easy movement of the chair and for practical environmental sanitization.

### Technical features:

- 3-motor electric adjustment
- Supply voltage: 220 V – 50 Hz
- Low voltage motors 24 V-DC
- Lifting capacity: 200 Kg
- Protection degree: IP54
- Weight of the chair: 106 Kg
- Maximum seat height (from ground): 545-920 mm
- Trendelenburg: -17°
- Wheel diameter: 125 mm
- N. 2 lockable wheels and N. 2 free wheels

### Options:

- adjustable headrest
