

Specialized clinic armchair h634_37

Armchair for treatments and blood samples for hospital use. Capacity: 200 kg. With 2 motors.

Armchair for specialist examinations, blood samples, chemotherapy and treatments, specific for use in hospital facilities and clinics. Thanks to the **electrical operation** it is possible to adjust it to various positions using a practical **handset**. In particular, it features **2 motors for simultaneous and independent movement of the backrest and leg sections** and for reaching the **trendelenburg 10° position**. Complete with **armrests** removable, with rotation function, tiltable up/down, folding at 90° **and** whose movement is integral to the movement of the backrest. It can be easily moved from one place to another thanks to the **4 swivel wheels** mounted on the base. The structure consists of a **painted steel frame** and a **surface covered in eco-leather**, easy to clean and capable of preventing infections to the maximum. This armchair is also equipped with **2 foam cushions**, one on the backrest and seat and one on the leg rest, which ensure a comfortable seat suitable for preventing possible pressure sores.
