

Spheroidal road manhole cover h638_26

Spheroidal ductile iron manhole cover. Dimensions: 600 x 600 x H.85 mm. Clear opening: Ø 500 mm.

Spheroidal ductile iron manhole cover with a square frame at the base and circular at the top, ideal for closing aqueduct, sewer, or inspection manholes on vehicular and pedestrian roads. **The product is essential for leveling the road surface and ensuring safety**, avoiding dangerous openings in the ground. **The anti-slip patterns on the cover ensure the runoff of surface water**, while the U-shaped internal rebate with an elastomer gasket **reduces noise and oscillation**.

Technical features:

- Adequate continuous external perimeter flange provided with slots for better anchoring in the foundation
- Eyelets useful for handling during the installation phases
- Closed-bottom hinge housing with a lid locking system in the open position
- Closed-bottom slot suitable for receiving the opening and lifting key
- Steel locking system made by a bolted rotating latch with a helical counter-spring
- Appendix suitable for ensuring the articulation of the lid to the frame in the hinge housing without preventing the lid's removal
- External dimensions: 600×600 mm
- Clear opening: Ø 500 mm
- Height: 85 mm
- 110° Max hinge, 90° block hinge, Key, Gasket
- Frame shape: square
- Cover shape: circular
- Weight: 40 kg
