

Spill containment pallet h332_11

Spill containment pallet for the industrial sector. Capacity: 350 liters. Dimensions: 1300 x 1300 x 300 mm.

Ecological spill pallet for the industrial sector, ideal for **4 drums**. The item allows for the collection of any hazardous liquid spills from the drums. The tank is made of **powder-coated galvanized sheet metal** and is equipped with a **heel-proof grating** that allows the liquid to drain into the collection sump. The product has a total height of 300 mm and a capacity of **350 liters**. Thanks to the liquid containment tank, it is possible to preserve the environment, preventing the leakage of harmful substances into the ground.

Technical features:

- Material: Electrowelded galvanized steel
- Capacity: 350 L
- Total length: 1300 mm
- Total width: 1300 mm
- Grating width: 1000 mm
- Total height: 300 mm
- Internal height: 200 mm
- Empty weight: 78 kg
- Capacity: 350 L
