

Spill containment pallet with tool panel h874_27

Spill containment pallet with galvanized grate, polyamide wheels, and tool panel, ideal for holding 1 x 200-liter drum. Dimensions: 870 x 890 x h 2110 mm.

The **spill containment pallet with tool panel h874_27** represents a versatile and reliable solution for the safe management of industrial liquids. Designed to contain and store **one 200-liter drum** in a vertical position, this pallet stands out for its robustness and practicality.

Made of **3 mm thick steel sheet**, the structure guarantees impact resistance and long-term durability, even in demanding industrial conditions. The **high-capacity galvanized grate** (up to 1000 kg/m²) provides stable support for the drum and facilitates liquid drainage. The presence of **hot-dip galvanized push handles** and **polyamide wheels** ensures easy movement even in tight spaces. The **wheels, two swivel (one with brake) and two fixed**, with a diameter of 180 mm, guarantee stability and ease of use.

The pallet is equipped with an **integrated tool panel with square perforations (10 mm)**, perfect for safely storing the tools needed during decanting or maintenance operations. With a **collection capacity of 203 liters**, this pallet is ideal for containing any leaks or spills, ensuring a safe working environment in compliance with current regulations.

The product is painted in **RAL 2000 color**, but it is possible to request, upon quotation, other colors or a galvanized version for greater resistance to atmospheric agents.

Choose the **h874_27 containment pallet** for efficient and safe management of industrial liquids. Take advantage of the quality of materials and innovative solutions. **Order now!**

Technical features:

- **Dimensions:** 870 x 890 x h 2110 mm
- **Maximum capacity:** 1 x 200 lt drum
- **Sump volume:** 203 lt
- **Total weight:** 100 kg
- **Pallet material:** 3 mm thick steel sheet
- **Galvanized grate:** load capacity up to 1000 kg/m²
- **Galvanized steel sheet** with square perforations (10 mm) in a continuous 38 mm grid for free positioning of tool holders
- **Wheels:** 2 fixed and 2 swivel in polyamide, Ø 180 mm (1 swivel with brake)
- **Handles:** hot-dip galvanized
- **Color:** RAL 2000

User benefits:

- **Simple handling:** thanks to the push handles and robust wheels.
- **Safe containment:** high capacity and galvanized grate for stable support.
- **Versatility:** ideal for different industrial sectors and types of liquids.
- **Additional space:** tool panel for organizing instruments.
- **Resistance:** high-quality materials designed to last over time.

FAQ:

- 1. For what uses is this pallet recommended?**
It is ideal for the management and storage of industrial liquids, with capacity for one 200-liter drum.
- 2. What is the load capacity of the grate?**
The galvanized grate can support up to 1000 kg/m², guaranteeing stable support even for heavy loads.
- 3. Is the pallet suitable for outdoor environments?**
The standard version is suitable for indoors; for outdoor use, a galvanized version is available upon request and prior quotation.
- 4. What are the dimensions of the wheels?**
The wheels have a diameter of 180 mm and are designed to ensure stability and ease of maneuver.
- 5. Is the tool panel fixed?**
Yes, the tool panel is integrated into the structure and offers a convenient space for storing tools.

Short buying guide:

Investing in the **h874_27 containment pallet** means opting for a solution designed to guarantee safety, efficiency, and durability. Thanks to the **robust structure** in steel sheet and the ability to contain any spills, this pallet is perfect for use in industrial settings.

Before proceeding with the purchase, evaluate the dimensions and needs of your workspace. The wheels and handles ensure easy movement, while the integrated tool panel adds practicality for decanting operations. For specific needs, such as use in outdoor environments, a galvanized version is available upon request, subject to a quotation.

Choose h874_27 for safe containment and efficient liquid management!

Industrial spill tray, 200-liter drum container, high-capacity galvanized grate, safe management of industrial liquids, wheeled containment pallet, liquid storage for industrial environments, tool panel for decanting, durable steel materials, certified liquid container, chemical liquid tray, leak collection solution, robust containers for oils and solvents.
