

Spill containment tray with wheels h332_13

Ecological spill containment tray. Wheeled model. Capacity: 180 L. Dimensions: L.1300 x H.800 mm.

The spill containment tray is an ideal item for manufacturing companies, as it prevents the spilling of hazardous liquids into the ground. The item is made of **powder-coated galvanized sheet metal** and features a **heel-proof grate**, through which the liquid can reach the collection tank.

The wheeled structure with **2 swivel wheels and 2 fixed nylon wheels** allows for safe and easy movement of the tray from one place to another.

Technical features:

- Material: electro-welded galvanized steel
- Capacity: 180 L
- 2 swivel wheels and 2 fixed nylon wheels
- Total length: 1300 mm
- Internal length: 1000 mm
- Total height: 800 mm
- Internal height: 200 mm
- Unladen weight: 65 kg
- Color: Blue
