

Spill kit for chemical liquids absorbency 181 lt h1043_24

181 lt chemical spill kit in a wheeled metal cabinet. Dimensions: 580x460x1000 mm. Steel sheet with wheels and safety lock.

The **spill kit for chemical liquids** (model h1043_24) is a high-capacity emergency response system, set up inside a wheeled metal cabinet with a handle for easy positioning. Specifically designed for laboratories, chemical industries, logistics depots and maintenance departments, this device is aimed at company safety managers who need a centralized and protected mobile decontamination station against aggressive substances. The system solves the operational problem of **secure storage of absorbent materials and timely intervention** in case of major spills of hazardous chemical fluids on industrial floors. The cabinet is made of P02 carbon steel sheet, subjected to a phospho-degreasing treatment in high-temperature tunnels and finished with epoxy-polyester painting in YELLOW RAL1021 color with baking in a 180° thermal gallery, guaranteeing maximum structural resistance and immediate visibility in case of an environmental emergency.

Technical features

- **Minimum absorbent capacity:** 181 liters
- **Cabinet dimensions (WxDxH):** 580x460x1000 mm
- **Structure material:** P02 carbon steel sheet
- **Surface treatment:** phospho-degreasing in high-temperature tunnels
- **Painting:** epoxy-polyester in YELLOW RAL1021 color with baking in a 180° thermal gallery
- **Logistics configuration:** wheeled cabinet equipped with positioning handle, 2 rear rubber wheels and front adjustable feet
- **Internal organization:** height-adjustable containment shelves
- **Closing system:** ergonomic plastic and aluminum lock with double key, complete with rod closure with tamper-proof rod cover casing
- **Absorbent rolls included:** 1 absorbent roll with dimensions 41 cm x 46 mt
- **Absorbent socks included:** 7 absorbent socks with dimensions 7.6x120 cm
- **Absorbent cushions included:** 2 absorbent cushions with dimensions 25x25 cm
- **Loose absorbents included:** 1 bag of 10 kg granulated powder absorbent material
- **Cleaning accessories:** 1 dustpan and brush kit
- **Eye protection devices:** 1 pair of protective goggles
- **Hand protection devices:** 1 pair of neoprene gloves
- **Residue disposal systems:** 5 waste collection bags
- **Specific intended use:** absorption and containment of chemicals, aggressive and dangerous liquids
