

Spill kit for chemical products with container h1045_10

Emergency spill kit for aggressive, caustic, toxic, and acidic chemical products, complete with a 600x400x320h mm protective storage box. High-resistance equipment with 25 yellow sheets, 12 socks, and PPE.

The **spill kit for chemical products with container** (model h1045_10) is a professional safety system specifically engineered for the rapid absorption and controlled neutralization of hazardous liquid substances. Developed for **chemical laboratories, workshops, pharmaceutical industries, battery charging centers, and galvanizing plants**, this device is aimed at safety managers (RSPP) and plant technicians who must ensure compliance with Legislative Decree 152 of 03.04.06 and subsequent amendments with Legislative Decree 4 of 16.01.08, as well as ISO 14000 procedures, ADR, and Ministerial Decree 20/2011. The kit solves the operational problem of **the lack of certainty regarding the composition of the spilled liquid, protecting personnel and the environment from corrosive, caustic, and toxic acids**, in addition to managing most common industrial liquids. The internal materials, yellow-coded to identify chemical risk, have been rigorously tested to certify effectiveness with sulfuric acid. All equipment is housed inside a robust storage box with a sliding lid for practical and immediate transport to the site of the incident.

Technical features

- **Structural type:** practical portable kit for storage and emergency response
- **Absorbent action spectrum:** capable of absorbing aggressive, caustic, toxic, acidic, and alkaline chemical liquids, including most industrial liquids
- **External container dimensions (LxPxH):** 600 x 400 x 320 mm
- **Container configuration:** protective storage box equipped with a lid with sliding closure
- **Certified absorbent efficiency ratio:** approved and tested by the Polytechnic of Turin (Report L.M.DSMIC n° 13/16/2011) where 0.118 kg of material absorbs 1 liter of sulfuric acid with a density of 1.27 Kg/dm³
- **Absorbent sheets included:** 25 single-thickness yellow sheets with properties suitable for emergency cleaning and for collecting large quantities of acidic and alkaline liquids with extreme practicality
- **Containment socks (first size):** 6 matching yellow socks to limit spreading
- **Containment socks (second size):** 6 matching yellow socks to limit spreading
- **Personal Protective Equipment (P.P.E.) included:** 1 pair of protective gloves and 1 respiratory protection mask
- **Residue collection accessories:** 3 robust bags intended for the disposal of exhausted materials
- **Regulatory framework and certifications:** compliant with Legislative Decree 152 of 03.04.06 and subsequent amendments with Legislative Decree 4 of 16.01.08, ISO 14000 procedures, ADR, Ministerial Decree 20 of 24.01.11 and Official Gazette n° 60 of 14.03.11, Ministry of the Environment and the Protection of the Territory and the Sea
