

Spill tray with drum support h874_22

Spill tray for horizontal storage of 1 60-liter drum, with galvanized support and steel structure. Dimensions: W 940 x D 500 x H 1075 mm.

The **industrial spill tray h874_22** is designed for the safe storage and horizontal filling of **one 60-liter drum (not included in the supply)**. Complete with a **galvanized support**, it ensures maximum stability and practicality for the industrial sector, making decanting and containment operations simple.

Made of **3 mm steel sheet**, the tray guarantees resistance and reliability, with a **galvanized grating** that supports up to **1000 kg/m²**, making it ideal for industrial applications and intensive work environments. The drum support is designed to ensure the correct positioning of the drum in a horizontal position, facilitating filling and preventing spills.

The handling system is equipped with **2 swivel wheels** and **2 fixed polyamide wheels Ø 100 mm**, of which **one is swivel with brake**, ensuring easy maneuverability even in tight spaces. The **integrated push handle** further improves ergonomics during transport.

Thanks to the **sump capacity of 61 liters**, this tray represents a safe and compliant solution for containing any leaks or spills. The tray is available in the color as shown in the photo, but on request, it can be supplied in **different RAL colors or galvanized**, upon request for a quote.

Ensure safety and efficiency for your industrial environment with the **spill tray h874_22**. **Order now** and get a robust and reliable solution for your storage and decanting needs!

Technical specifications:

- **Maximum number of drums:** 1 x 60 liters (drums not included in the supply)
- **Structure:** 3 mm steel sheet
- **Grating:** galvanized, capacity 1000 kg/m²
- **Wheels:** 2 swivel and 2 fixed polyamide Ø 100 mm (one swivel with brake)
- **Push handle:** integrated
- **Dimensions with push handle:** W 940 x D 500 x H 1075 mm
- **Sump dimensions:** 800 x 500 x 415 mm
- **Sump capacity:** 61 liters
- **Weight:** 49 kg
- **Coloring:** color as per photo
- **Drum support:** for horizontal storage and filling (supplied disassembled)

User benefits:

- **Easy handling:** swivel wheels and push handle for simple and safe transport.

- **Guaranteed safety:** tray with a sump capacity of 61 liters to prevent accidental spills.
- **High resistance:** steel structure and high-capacity galvanized grating for intensive use.
- **Operational flexibility:** drum support designed to facilitate horizontal filling and storage.
- **Customization available:** RAL colors or galvanization on request to adapt to any aesthetic or environmental need.

FAQ:

1. For which types of liquids is this tray suitable?

The tray is designed to contain and manage spills of common industrial liquids, such as oils and solvents, but it is always recommended to check compatibility with the specific liquid.

2. Do the wheels guarantee good mobility?

Yes, the polyamide wheels, of which one is swivel with brake, ensure high maneuverability even in tight spaces.

3. Is the tray resistant to heavy loads?

Certainly, the galvanized grating has a capacity of 1000 kg/m², making the tray suitable even for high loads.

4. What materials are used for the structure?

The tray is made of 3 mm steel sheet and the grating is in galvanized steel, ensuring maximum strength and durability.

5. Is the tray suitable for containing spills of corrosive liquids?

Yes, the steel structure and galvanized grating offer excellent resistance to industrial liquids. However, for specific uses it is recommended to check the compatibility of the materials with the liquid to be contained.

Short buying guide:

Choosing the **industrial spill tray h874_22** means investing in a robust and functional product for the safe management of industrial liquids. Ideal for the **horizontal filling of 60-liter drums**, this tray combines practicality and efficiency thanks to the galvanized support and the handling system with wheels and handle.

Made with **high-quality materials**, such as galvanized steel and high-capacity grating, it guarantees long life and optimal resistance to spills. Before purchasing, consider the dimensions and sump capacity to ensure that the product meets your needs. This tray represents a versatile solution for every industrial environment.

Don't miss the opportunity to improve the safety and efficiency of your warehouse with the **h874_22 tray**. Trust a product designed for safe and practical management!
