

Spine board for rescue h655_01

Spinal stretcher for first aid. Compatible with X-rays and MRI. Dimensions: L185 x D43 x H5 cm

Emergency spine board, ideal for first aid operations. Designed to transport patients with serious head or spinal injuries. **Robust, stable and buoyant**, it can therefore also be used for water rescues. **Compatible with X-rays and MRI**, to allow the examination of the patient without the need to move them to another stretcher. Available in a version with 3 belts to ensure greater safety and keep the patient steady.

Technical features:

- Dimensions: L185 x D43 x H5 cm
- Compatible with X-rays and MRI
- Buoyant
- Available in the version with or without belts
- Color: light green

The emergency stretcher h655_01 is also available on the MEPA portal. Discover how to find our company on the [Public Administration portal](#).
