

Spiral bicycle rack H 90 cm h972_149

Stainless steel spiral rack H 90 cm. Ideal for small bikes. Dimensions: L 1162 x Ø 600 mm.

The **H972_149 spiral bike rack** is a compact rack with a modern design, designed for **urban furniture** and for all spaces that need an **elegant, resistant and space-saving solution** for bicycle parking. Made of **304 stainless steel**, it guarantees **high resistance to corrosion** and bad weather, making it perfect for **permanent installation in outdoor environments** with high traffic such as schools, squares, companies, residential areas and condominiums.

The **spiral design** allows for **neatly parking several small bicycles** such as city bikes, children's bikes and small e-bikes. Each bike can be locked **securely** to both the frame and the wheel, thanks to the wide spaces of the spiral and the possibility of use with chains or padlocks.

Installation is quick and safe: the bike rack is fixed to the ground using **plates with 8 anchoring points** (2 x 4 holes Ø12 mm), guaranteeing **maximum stability and resistance** even in high-traffic areas.

Thanks to its refined appearance and the quality of the materials, the H972_149 model integrates harmoniously into both modern and traditional contexts, **promoting sustainable mobility** with style.

Choose a resistant, elegant and space-saving bike rack for your public or private spaces: order the **H972_149 spiral model** now or request a personalized offer for large supplies.

FAQ:

1. **How many bicycles can it hold?**
The spiral design allows for parking several small bicycles, depending on the size.
2. **Is it also suitable for adult bicycles?**
It is mainly recommended for small bicycles.

3. **Is the ground fixing resistant?**

Yes, thanks to the plates with 8 Ø12 mm holes, it guarantees excellent stability.

4. **Does stainless steel withstand bad weather?**

Yes, 304 stainless steel is ideal for permanent outdoor installations.

5. **Does it need maintenance?**

No, the material and structure ensure durability without maintenance.

Mini buying guide:

When choosing a bike rack, it is important to consider **the type of bike to be accommodated, the installation position and the resistance of the material**.

The H972_149 model is ideal for **small bicycles** and is perfect in public and private contexts where a **safe, durable and attractive design** solution is sought.

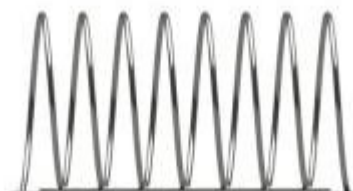

Stainless steel guarantees **longevity and zero maintenance**, while the fixing with 8 anchoring points ensures a firm hold even in high-traffic areas.
