Spring rider for playground h172_54

Little fish shaped spring rider for private use, made with rounded edges and double seat. Dimensions 80x40x80 cm, safe and colorful.

The spring rider **h172_54** is a play solution designed to enrich private outdoor spaces, such as residential gardens and external areas of hospitality facilities. Featuring a **little fish** shape with bright colors, the device is designed to stimulate children's motor activity and coordination in total safety. The structure has no sharp edges, thanks to processing with rounded edges that prevents accidental impacts and cuts, making it ideal for contexts where user protection is a priority.
