

Spring rider for playground h749_04

Horse-shaped spring rider in tri-laminate HDPE for playgrounds. Dimensions 37x26x92 cm, ideal for children aged 2 to 6.

The **h749_04** spring rider is a play solution designed for furnishing outdoor spaces dedicated to children, such as public parks, school gardens, and recreational areas of accommodation facilities. The horse-shaped structure is made with **three-layer HDPE (high-density polyethylene) panels**, a material that ensures high resistance to atmospheric agents and intensive use without the need for constant maintenance. Ergonomics are guaranteed by integrated handles and footrests made of high-resistance plastic material, designed to offer a secure grip during the oscillatory movement.

Technical characteristics

- **Dimensions:** W. 37 x D. 26 x H. 92 cm
- **Material:** 3-layer HDPE with 15 mm thickness
- **Components:** Handles and footrests in technical plastic
- **Age range:** 2-6 years
- **Free fall height (FFH):** Less than 100 cm
- **Safety area:** 5 sqm
- **Capacity:** 1 user
- **Installation:** Designed for stable ground fixing
