

Square ball pool for children h999_56

Square ball pool for children (150x150x40 cm) in high-density foam (25 kg) and PVC. Safe, antibacterial and equipped with a practical snap-on closure.

The **square ball pool for children h999_56** is a ludic-motor equipment designed to meet the specific needs of educators, therapists, and managers of spaces dedicated to early childhood. This structure solves the primary need to create a protected area for play and psychomotricity within school and recreational environments, ensuring safe containment for young users. Made with materials specifically selected for prolonged contact, it protects children from possible accidental impacts and proves to be a strategic ally for staff, simplifying room tidying operations thanks to a stable architecture and a practical, immediate assembly system.
