

Square cast iron tree guard h950_19

Square cast iron tree guard grate h950_19 with powder coating. Dimensions: W 155 x D 155 x H 3 cm. Weight: 92 kg.

The **square cast iron tree guard h950_19** is the ideal solution to ensure the **protection** and **safety** of plants in urban spaces such as parks, streets, and squares. Made entirely of **high-quality cast iron** and treated with a resistant **powder coating**, this tree guard not only protects the root system of trees but also contributes to maintaining the order and aesthetics of public spaces. The **robust structure** and **classic design** make this product a functional and decorative element, perfect for integration in both modern and traditional urban contexts.

The **generous dimensions of 155 x 155 cm** allow for effective coverage of the ground around trees, avoiding damage to roots and facilitating pedestrian passage. The **weight of 92 kg** ensures stability and resistance to intensive use and weather conditions, preserving its integrity over time. The powder coating offers an additional protective layer against corrosion, ensuring a long life and minimal maintenance.

Choose the **square cast iron tree guard h950_19** for effective and lasting protection of your green areas. Invest in the quality and safety of your public spaces with a robust and elegantly designed product. **Request information** and make your urban environment unique!

Technical features:

- **Dimensions:** W 155 x D 155 x H 3 cm
- **Weight:** 92 kg
- **Shape:** square
- **Material:** cast iron
- **Coating:** powder

User benefits:

- **Effective protection:** Safeguards the root system of trees, preventing accidental damage.
- **Improved urban aesthetics:** The elegant design fits perfectly into city contexts.
- **Superior resistance:** Robust construction resistant to the most difficult weather conditions.
- **Ease of use:** Stable structure that does not require frequent maintenance.
- **Versatility of use:** Suitable for parks, streets, avenues, and squares.

FAQ:

1. **Is the tree guard suitable for all types of outdoor environments?**

Yes, it is designed to withstand various environmental conditions, thanks to its powder coating that protects against corrosion.

2. **How much does the tree guard weigh?**

The weight of the tree guard is 92 kg, which makes it stable and resistant to intensive use.

3. **Is the structure resistant to atmospheric agents?**

Yes, the cast iron and powder coating ensure a long life even in adverse weather conditions.

4. **What are the main advantages of cast iron?**

Cast iron is known for its robustness and ability to maintain shape and functionality over time, even in high-traffic urban environments.

5. **Is it suitable for avenues and high-traffic areas?**

Yes, its resistant structure makes it ideal for installations in zones with high pedestrian and vehicle traffic.

Mini buying guide:

Choosing a robust and durable tree guard like the **h950_19** is fundamental for protecting tree roots and maintaining the aesthetics of your public spaces. Made of **cast iron** and **powder-coated**, this model offers high resistance to corrosion and weathering, minimizing the maintenance required. Evaluate the **dimensions** and **weight** to ensure it fits perfectly into the installation area and meets the protection and safety needs of your community.
