

Square outdoor litter bin with lid h287_395

120-liter urban furniture litter bin in galvanized steel and Nordic pine, 41x41x80 cm, designed for resistance and aesthetic integration in outdoor spaces.

The **h287_395 outdoor litter bin** is an advanced urban furniture solution, conceived to balance the natural elegance of wood with the structural strength of industrial steel. Specifically designed for waste management in high-traffic areas, this model ensures an effective response to the needs of public entities and commercial space managers who require furniture elements resistant to intensive use cycles and constant exposure to atmospheric agents.

Technical features

- **Supporting structure:** frame made of Sendzimir galvanized steel tubes, sections of 30x15 mm and 15x15 mm for high structural rigidity.
- **External cladding:** vertical Nordic pine slats, pressure-treated with non-toxic salts to prevent biological deterioration (sec. 85x20x750 mm).
- **Protective lid:** galvanized steel sheet with 20/10 thickness, shaped by laser cutting and complete with ergonomic handle to facilitate emptying operations.
- **Volumetric capacity:** useful volume of approximately 120 liters, sized for contexts with high user flow.
- **Metal surface treatment:** electrostatic powder coating cycle with oven curing process at temperatures between 180°C and 200°C.
- **Certifications and hardware:** galvanized hardware and bolts complying with UNI 3740 standard; use of certified non-toxic paints.
- **Overall dimensions:** 41 x 41 x H 80 cm.
- **Installation system:** base prepared for stable and secure flush-to-floor anchoring through bolting.
