

## Square planter with wheels for urban furniture h109\_276

50x50x50 cm square galvanized steel planter for urban furniture, with laser-cut structure, integrated wheels and water drainage system.

The 50x50x50 cm square planter is a professional solution designed for the set-up of public spaces, pedestrian areas and commercial contexts requiring high resistance and flexibility. Made with a box structure in laser-cut and bent steel sheet, it stands out for the precision of the finishes and constructive solidity. The upper frame is obtained directly from the sheet metal fold, giving aesthetic cleanliness and structural robustness. The bottom, fully welded to the walls, is reinforced by a lower metal flat frame that lifts the structure off the ground, facilitating stability and protection of the base.

### Technical features

- **Material:** Galvanized steel and painted with thermosetting polyester powders
- **Dimensions:** 500 x 500 x 500 mm
- **Processing:** High-precision laser cutting and mechanical bending
- **Drainage system:** Integrated drainage holes on the bottom for the evacuation of excess water
- **Handling:** Kit of 4 industrial wheels, 2 of which are equipped with parking brakes
- **Protection:** Anticorrosive galvanizing treatment and UV-resistant RAL finish
- **Base:** Welded structural rise for protection from rising damp
