

Square road gully h638_34

Road gully with square frame and grate. External dimensions: 800 x 800 mm. Height: 65 mm.

The road gully is a fundamental urban furniture element to ensure **proper rainwater collection**, preventing it from settling on the road surface. At the same time, the product represents a **safety device** aimed at preventing cars and pedestrians from suffering damage due to uneven road surfaces. The product features a **ductile iron structure** built **according to UNI EN 124 standards** and consists of a **square-shaped frame** both at the support base and at the top corresponding to the road level, and a square-shaped grate.

The frame is equipped with:

- Continuous external perimeter flange on all four sides
- Reinforcement ribs
- Shaped lugs on the inner edge for locking the grate closing system
- Holes for the grate hinge
- Internal tabs at the four corners for housing an optional siphon

The grate is equipped with:

- Parallel slots
- Locking system, unlockable with a general lever
- Holes for hinging to the frame
- Pair of nuts and bolts inserted to prevent theft and tampering
- Anti-slip embossing

Technical features:

- Material: ductile iron UNI EN 124
- Siphonable
- Anti-theft locking
- Automatic closing
- External dimensions: 800 x 800 mm
- Clear opening: 700 x 700 mm
- Height: 65 mm
- Discharge dm²: 22.09
- Weight: 59 kg
- Certification: ISO 9001:2015

INFORMATION

- Length in millimetres 800.000000
- Depth in millimetres 800.000000
- Height in millimetres 65.000000
