

Square tree grate 120x120 cm h330_48

Square grate for the protection of plants and trees, in laser-shaped steel, composed of 4 sectors. Dimensions: W. 1200 x D. 1200 x h. 44 mm. Corten finish.

The **h330_48 grate** is designed to offer solid and visually pleasing protection at the base of plants and trees in urban contexts and public spaces. The structure, made of **steel**, is **laser-cut** to ensure precision and a refined aesthetic.

Divided into **4 sectors**, the grate is easily assembled using the **hot-dip galvanized steel screws** included in the supply, and equipped with a **perimeter reinforcement plate** of the same thickness that ensures robustness and stability. The system is completed by **fixing brackets** to the ground, both on concrete and via expansion bolts, for a secure and long-lasting anchoring.

The **corten finish** gives a natural and contemporary look, ideal for urban furniture projects that combine functionality and style. The low height allows for unobstructed pedestrian passage, while protecting the root zone of the plants.

A professional choice to enhance public space and safeguard urban greenery.

Protect and furnish with elegance: choose the **h330_48 square grate**, robust, functional, and with a modern design.

Technical features:

- **Model:** square
- **Material:** laser-cut steel
- **Number of sectors:** 4
- **Perimeter reinforcement plate:** steel
- **Finish:** corten
- **Dimensions:** W. 1200 x D. 1200 x H. 44 mm
